SOFTWARE DEVELOPER (STUDENT POSITION)

Highly motivated Computer Science Co-op student with hands-on experience building web and mobile applications from scratch, utilizing the MERN stack and React Native alongside AI-assisted tools to speed up delivery while maintaining a strict focus on system verification and debugging.

PERSONAL PROJECTS

MindTock | React Native, Expo, Kotlin, TypeScript, Node.js, OpenAI API | July 2026 – Present

Project Scope: Architected, verified, and published a live mobile utility application to the Google Play Store, managing the full release pipeline.

- Integrated OpenAI API with a custom Node.js backend, using AI-assisted development tools throughout to design content moderation and fallback logic.
- Built and published an Android alarm app to Google Play Console requiring users to complete a challenge to dismiss the alarm.
- Developed native Kotlin modules for reliable alarm delivery on locked devices.
- Debugged native build issues and managed the full Google Play release process.

Car Website | MERN Stack, REST APIs | June 2025 – September 2025

Project Scope: Developed a local full-stack web application featuring a hardcoded frontend inventory catalog, dedicated vehicle detail pages, an automotive news blog, and a service appointment booking system using backend.

- Created reusable React components to dynamically render individual vehicle specification pages and layout the automotive news blog.
- Built an automated appointment booking system to capture user data and handle service scheduling workflows.
- Used Node.js and Express.js to build the backend logic for processing service appointment requests.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, TypeScript, C, Kotlin, HTML, CSS
- **Development Tools:** Git, GitHub, Postman, Claude, Google Play Console
- **Databases & Operating System:** MongoDB, Windows (10/11), macOS
- **Framework and Libraries:** React, React Native, Node.js, Express.js, Expo

EDUCATION

Bachelor of Computing, Computer Science (Co-op) **2025 – Expected June 2030**

University of Guelph, Guelph ON

CERTIFICATIONS

- Cloud Computing | May 2026 – Present | New Horizons, Lagos Nigeria
- Full Stack Software Development (Back End) | Jan. 2025 – June 2025 | New Horizons, Lagos Nigeria
- User Interface/User Experience (UI/UX) | Dec. 2024 – Feb. 2025 | New Horizons, Lagos Nigeria
- Full Stack Software Development (Front End | July 2024 – Feb. 2025 | New Horizons, Lagos Nigeria

VOLUNTEER

Technical volunteer | Google Developer Club | November 2025

- Participated in peer code reviews and collaborated with other volunteers to help other students debug their code.

EXTRA-CURRICULAR EXPERIENCES

1st place, FLL Open Championship | May 2023

- Programmed robot to complete task more efficiently.
- Collaborated with teammates to brainstorm and implement innovative design features.
